

# SDH Farm Walk Through

Managing second-round grass and milk urea

Wednesday 8 October, from 11am to 1pm

SDH Cow Shed, 611 Ryal Bush Wallacetown Rd

Come along for a wander around the Hub with the SDH team and guest speakers, chat about pasture management, and enjoy some kai.

Dr Charlotte Westwood (PGG Wrightson Seeds) will cover managing pasture quality for the second round, how to test pasture quality, and what milk urea tells us at this time of year.

She'll be joined by Leo Pekar (FarmWise), who will cover how to balance pasture quality intakes before mating, the key trigger points to watch, and how the feed wedge supports decision-making.

Dr Charlotte Westwood

Leo Pekar

## This is a free event – all farmers welcome!
